

## **PacketStorm Communications Is Awarded “Editors’ Choice 2002” By Internet Telephony Magazine**

**Eatontown, New Jersey (March 6, 2002)**

PacketStorm Communications® announced today that their 1800E and 2600E IP Network Emulators have been awarded “Editors’ Choice 2002” by Internet Telephony Magazine.

Reviewers at Internet Telephony were quite positive in the comments that they made during their TMC Labs analysis of PacketStorm’s products. The article noted the ease of use and the complex emulation capability. Applications include “VoIP, IP conferencing, cable telephony, VPN, QoS, DiffServ and wireless IP.” The article went on to refer to the GUI as “one user-friendly interface” and that “both the PacketStorm 1800E and 2600E are highly recommended, mainly because of their outstanding set of features.”

“We were quite pleased with the review that was written on our products by Internet Telephony in their February 2002 edition” said James Rodden, PacketStorm’s Director of Marketing. “One of our primary focuses during product development was to make sure we offered the most powerful, yet easiest to use emulator on the market. The favorable comments made by Internet Telephony, and their overall ‘A minus’ rating confirmed what many of our customer’s have already told us – The PacketStorm family of IP Network Emulators continues to exceed expectations.”
